PROFILE

Motivated and detail-oriented Computer Science graduate with 4+ years of professional experience in backend development, chatbot systems, and custom web applications. Passionate about building efficient, scalable, and secure systems that solve real-world problems. Looking to contribute my expertise in PHP, Laravel, API integration, and bot architecture to a dynamic team focused on impactful technology solutions.

WORK EXPERIENCE

Staff India — FEBRUARY 2025 – PRESENT
Full Stack Developer

- Created web applications including blogging platforms, CMS, university result systems, and e-commerce portals using Laravel.
- Developed scalable enterprise-level systems for data management and user interaction

Preneurlab — September 2020 – January 2025
Backend Developer

- Designed and developed multi-platform chatbots for Messenger, WhatsApp, Viber, and Web, serving enterprise clients like Robi and Airtel.
- Implemented dynamic multi-step forms within bots to collect complaints, feedback, and queries.
- Integrated third-party REST APIs (e.g., Dost AI) for intelligent bot responses and web content extraction.
- Developed secure chatbot platforms resistant to third-party or hacker interference.
- Created custom dashboards displaying revenue analytics, user behavior, product management, and issue reporting.
- Added chatbot-based e-commerce capabilities to allow users to browse and purchase products.
- Built additional systems like POS solutions, bot analytics platforms, and privacy-compliant CMS applications.

EDUCATION
